

Recycling Toner Cartridges: Helps planet Earth!

Don't throw away that empty toner cartridge. Don't simply send that cartridge back to the manufacturer for their recycling and get nothing in return. Recycling empty toner cartridges will help our chapter Make A Difference.

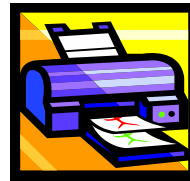

BRING YOUR EMPTY TONER CARTRIDGES TO THE JUNE MEETING AND PLACE THE CARTRIDGES IN THE BIN AND NJHFMA WILL BENEFIT!!

Why is Recycling Important?

Recycling the empty toner cartridges eliminates them from landfills and saves resources by recycling and reuse. At the same time, this environmentally and socially responsible act of recycling can help NJHFMA as we contribute the proceeds of the program to ***The Food Bank of New Jersey and Habitat for Humanity.***

How does this recycling program work?

The key to the program is simplicity at the June Quarterly Meetings we will have a bin at check-in where you can deposit all of your empty toner cartridges. Once the empty toner cartridges are received, a donation will be made to the selected Foundation.

Types of Cartridges:

OEM CARTRIDGE	OEM cartridges are those that carry the same brand name as the manufacturer of the printer or copier. For example, an HP brand cartridge for an HP printer is an OEM cartridge.
COMPATIBLE CARTRIDGE	Compatible cartridges are those that carry a brand name different from the manufacturer of the printer or copier. For example, a "Staples Brand" cartridge for an HP brand printer is a compatible cartridge.

Please note that the recycling credit amount for each cartridge varies. The price for the empty cartridge in large part depends on the demand for the cartridge. Prices for the empty cartridges are updated monthly. It is important to note that empty toner cartridges returned for donations/credit must be in good condition. Broken or otherwise damaged cartridges cannot be accepted for credit in the program

Getting the most of the recycling program

As a participant in the toner program, the NJ Chapter of HFMA will receive a donation of 5% of the toner expense. Since toner cartridges are continuously used in business, the recycling program can develop into an on-going contribution stream for our selected Foundations and thus,
